Pill (pil), *sb.*[3] Forms: 1 pyll, 6 pille, 7 pile, 6- pill, (9 pyl). [In 16th c. *pille*, *pil*, app. = OE. *pyll*, var. of *pull*, *pul* 'pool, creek' (Bosw.-Toller) : cf. OE. *pil*, Welsh *pwll* pool.] A local name, on both sides of the Bristol Channel, on the lower course of the Severn, and in Cornwall, for a tidal creek on the coast, or a pool in a creek or at the confluence of a tributary stream.

All the examples of *hull* and *pill* in the charters in Kemble's *Cod. Dipl.*, refer to the Severn estuary or valley: no river, although no ME. instances have yet been found, the identity of the OE. and MDu. word seems certain.

Pill (pil), *sb.*[4] Forms: a. 2 pyllan, 3 pillen, 3-5 pille(n, 4-5 pylle. *β.* 4-6 pille, 7ylle, 4-7 pil, (8 pyl, 7vil), 4- pill. [Found in late OE. (12th c. MS.) in inflected form *pyllet*, in early 13th c. as *pullen*, *pillen*, 1300-1450 *pille*, forms which point to an OE. **pillan*, **pyllon*, varying with **pullan*, **pullon* : cf. *clippan*, *clyppe*, *clippe*, *clasp*-. *Pille*, with single *l* (usually *pile*), is found down to c 1450, when it was displaced by *pill* and *pele*, both of which had appeared in R. Brunne (1303-20). *Pill* and *pele* (now PEEL *sb.*[2]) continued as synonyms in all senses down to 17th c., when *peel* became the general Eng. form in branch II, *pill* now surviving only as a literary archaism, chiefly in sense 1; but, in the dialects, *pill* is widely used in the sense 'peel' (decorticate). No cognate words are found in Teutonic. OE. *pillian* was prob. ad. L. *pilare* to make bare of hair, and (prob.) of skin: cf. the compound *depillare* to make bald of hair or feathers, also to strip of the skin, to peel (Vulg., Exod. xxix. 28), fig. to pluck, plunder, fleece, cheat; also OF. *peler* to make bald, to peel or skin (the latter sense now usually referred to OF. *pel*, L. *pell-em*). It. *pelare* to make bald, sick, fleece, fay. With OE. *pillian*, from L. *pilare*, cf. OE. *pinnetian* from L. *pinnitare*, etc.

The early ME. *pile* usually *pile*, but R. Brunne (see *baptised, piled*) regularly represented OE. *pillian*, but *pullan* naturally gave *pele* (cf. *Christian*, CLANE), which was particularly identified with F. *peler*. The later *pell* (still in use) was prob. influenced by F. *peler* (= It., Sp. *pelare*, Pg. *pelar*)—late L. *pellare*, found in med.L. (Du Cange) for L. *pilare* to pillage, plunder. But no differentiation of sense between *pile*, *pill*, *pele*, is found in ME., and between *pill* and *peel* in early mod.Eng. and modern Eng. dialects. It is possible however that the influence of F. *peler* and *peler* is to be seen in the tendency since 17th c. to differentiate *pill* and *peel* (as far as *pill* has survived) in literary use.]

†**5.** A portable pillar borne as an ensign of dignity or office. *Obs.* exc. *Hist.*

Two of these, of silver gilt, were borne by pillar-bearers before Cardinal Wolsey and Cardinal Pole. They are not recorded otherwise, and appear to have been constructed by Wolsey for the silver mace or pike with a silver (or gilt) head, to which a cardinal had a right, and to have been retained by Pole. Representatives of Wolsey's pillars, sometimes borne by grillars, sometimes erected in tables with an archbishop's cross between, occur in the decorations of Christ Church, Oxford. Those of Pole are represented in the illumination on the first page of his Register of Wills at Somerset House; they are figured as Corinthian columns with capital and base, about the size of Roman faces, 31 to a ft. long.

A contrivance for the punishment of offenders, consisting usually of a wooden framework erected on a post or pillar, and formed, like the stocks, of two movable boards which, when brought together at their edges, have holes through which the head and hands of an offender were thrust, in which state he was exposed to public ridicule, insult, and molestation. In other forms, the culprit was fastened to a stake by a ring round his neck and wrists. (In quot. *a* 1380, the name is applied to the cross.) The Chinese *cangue* is a species of portable pillory.

In Great Britain the punishment of the pillory was abolished, except for perjury, in 1816, and totally in 1837. In England, U.S., it was not abolished till 1905.

L. *pipinella* (1278 c. in Hatz.-Darm.), all in our sense 1. Diez concludes that *piprenelle* was a corruption of *bipinnelle*, dim. of *bipennula*, dim. deriv. of *bipennis* 'two-winged' (perhaps referring to the pinnate or bipinnatifid leaves); and, in fact, the Burnet appears in the herbals and vocabularies of the 16th c. generally, as *bipinnella* or *bipennella*, sometimes *bipennalis*. Cf. also Ger. *bibernell*, MHG. *bibenelle*. The word has undergone much change of form, app. under the influence of 'popular etymology', as well as change of sense.

Before 1300, the L. name *Pimpinella* was transferred on the Continent, by 'the Pulicaries', to an umbelliferous plant resembling the Burnets in its leaves, and hence called Burnet Saxifrage, to which also in 1563 Alderson appropriated the botanical name *Pimpinella Saxifraga*. In 1597 this appears in the *Great Herball* of 1526 as *pympernel*, and in Turner as *pimpinell* after the L., while he gives *pympernell* for *Anagallis*, to which it had already been applied in 1538 c. vocabularies. No explanation of the last transference of the name appears.)

[ME. *pinacle*, a. OF. *pinacle* (1265), *pinnacle*, F. *pinacle*, ad. late L. *pinnāculum* (Vertull., Vulg. Matt. iv. 5), dim. of *pinna* wing, pinnacle, point.

In the Vulgate, Matt. iv. 5, *pinnāculum* renders Gr. πτερύγιον, dim. of πτερύξ wing, and was thus eminently suited as a play of *pinna* in sense 'wing': cf. the parallel *pinna* in Luke iv. 9. But in later times *pinnāculum* appears to have been viewed as belonging to L. *pinna* in the sense 'point, edge, battlement', which Welsh supplies from *pinaen*, variant of *penaen* feather: see PEN *sb.*[1] The Old Latin version in its earliest form had in Matt. iv. 5 and Luke iv. 9 *fastigium* (up or apex of a gable.)

1. A small ornamental turret, usually terminating in a pyramid or cone, crowning a buttress, or rising above the roof or coping of a building. (In early use sometimes applied to a battlement.)

2. *fig.* A petty annoyance, a minute irritation.

Policy of pin-pricks, a course of petty hostilities understood as a national or party policy: applied first in Nov. 1898 to the policy attributed to France in reference to the conflicting colonial interests of France and Great Britain.

The French use of a corresponding phrase *coup d'épingle*, 'pin-stroke', goes back some twenty years: in Eng. 'pin-pricks' is found in political use in 1882. On 8 Nov., 1898 the French journal *Le Matin* characterized a 'politique des riches à l'Anglaise', and 'de continuelles piqûres d'épingle': on 26 Nov. *The Times*, referring to this article, used the words 'a policy of "épingles"'. *Le Temps* of 19 Nov. (publ. evening of 18th) had an article denying on the part of France the existence of a 'politique de coups d'épingle', *The Times* of 19 Nov. quoted this as a 'policy of pin-pricks' (see quot.), which forthwith became a political phrase.

1882 *Public opinion* 4 Jan. 24/1 Petty pin-pricks on the coast of Africa had rather irritated than roused public opinion. 1887 ROSA N. CAREY *Uncle Max* xxviii. It is strange how carefully these little pin-pricks to our vanity affect us. 1897 *Spectator* 16 Apr. 526/1 Whenever the French Government can give the British Government a timely pin-prick, it gives it. 1898 *Times* 26 Nov. 9/1 Such a policy of 'épingles' is beginning to be recognized by sensible Frenchmen as a grievous error. *Ibid.* 19 Nov. 5/2 The *Temps* to-night contains a long article, entitled 'The Policy of Pin-pricks'. [*Ibid.* 15/1 According to the *Temps* there has never been any policy of pin-pricks. 1898 *Globe* 8 Dec. 1/2 The ground to bring the pin-prick policy to bear upon British interests in the Far East. 1900 *Daily Tel.* 10 Mar. 4/1 Russian provocation is at present but a policy of pin-pricks. 1900 *Westm. For this, another Sc. exercise in L. have *furca et fossa*. 'In some old deeds written in our language, these terms are rendered *furcs and fosse*' (Jamieson s. v.). The actual meaning of *pit* and *fossa* has been questioned. Du Cange has a quot. from Gervase of Canterbury in which *furca* is an ordeal pit: so also in *Cartulary of Battle Abbey* (Camd. Soc., 1916) 2 and it has been suggested that this was the the original meaning in *furca et fossa*. For in support of the usual interpretation, see *Laws of Athelstan* iv. 6 De hoc, qui persuerat vel iocum pacis adiecit: § 1, 6 Simile modo de...proripiente de ulno vel culmegarde (Schmid *Gesetze Angels.* 132). Strafe an Leben*: (1) Der Bluten an den Galgen, die Frau unter den Stein: (2) Den Mörder Hineinbringt mit dem Strang, den Frauen mit Wasser: (3) Den Dieb soll man braten, die Diebe mit Wasser. In Middle Dutch, where the parallel *galghe putte ende galghen* is very frequent, *putte* was a pit or pipes in which women criminals were buried alive (Second Supplement: see Verwijs and Verdam s. v. *Putte*).

[*Etym.* The form of this verb, and the fact that it has the collateral form PICK *v.*2 (*Shetl.*), but not entirely, northern), naturally suggests some etymological connexion with PICK *v.*1 (OE. *plūcian* or *pīcian*). And although the form *pick* appears in both verbs, they are formally distinct, in that PICK *v.*1 occurs with short and long *i*, has only weak *k*, never *ck*, while PITCH appears both with *ch* and *ck*, but never with long *i*. They are also quite distinct dialectally: dialects which use PICK *v.*1 for *pitch*, use *pike* for PICK *v.*2]

The *Fr. pitié* was the popular phonetic repr. of *pietātem*; *pitié* a clerical adaptation of *pietāt-*, and *pitié* repr. a semi-popular intervocalic form.

The sense of L. *pietās* 'piety', was in late L. extended so as to include 'compassion, pity', and it was in this sense that the word first appears in OF. in the two forms *pitet* and *pitié*. Gradually these forms were differentiated, so that *pitié*, which most closely represented the L. form, was used in the sing. L. sense, while *pitet* retained the extended sense. In ME. both *pite* and *pitee* are found first in the sense 'compassion', subsequently both are found also in the sense 'piety'; the differentiation of forms and senses was here scarcely completed by 1800.]

b. In modern use, forming the second element in the name of a group of houses in a town or city, now or formerly possessing some of the characters (positive or negative) of a square, chiefly that of not being properly a street.

Often used in the name of a small area more or less built around, and being wide from a street or thoroughfare, or of a short *cul-de-sac* or byway turning out of a main thoroughfare: also, more vaguely given to a short row or "terrace" of houses, which originally stood by themselves as a suburban small; being in fact a ready circumlocution for any aggregation of houses which cannot be more particularly classed.

Employed in sith c. to render F. *place* and its Italian, Spanish and German cognates, by reference to foreign towns, whence introduced in English towns. (Due to some cause the name 'Place' has retain out of sense 2b, the site being that of a nobleman's or bishop's town-residence, which has the name, e.g. *Ely Place* in London.)

L. *plāne-um* a flat surface, *sb.* use of neut. sing. of *plānus* adj., flat, introduced in 17th c. to express the geometrical and allied ones, which had been from the 16th c. (and were often down to the 18th) expressed by the historical form Plain. In F. *plan* had been similarly introduced *c* 1550. Cf. Plane *a.*]

1. a. A plane superficies; in Geom., a surface such that every straight line joining any two points in it lies wholly in it, or such that the intersection of two such surfaces is always a straight line; the simplest kind of geometrical surface, corresponding among surfaces to the straight line among lines. Hence, in *general* use, An imaginary superficies of this kind in which points or lines in material bodies lie; esp. a horizontal plane of such a kind, a level, as in 'clouds at various planes of elevation'.

Often (esp. in scientific use) with *of*, denoting the plane in which a particular figure, etc. is situated, or in or on which some process takes place: e. g. the plane of a circle, ellipse, etc., of the ecliptic, the equator, the horizon, a planet's orbit; *plane of the meridian*, *of bearing*, etc.; *plane of projection*, a plane upon which points, lines, or figures are projected: (for also below) Also with defining adjs., as *cycle plane*, *diagonal p.*, *diametral p.*, *inclining p.*, *polar p.*, *tangent p.*, *vertical p.*, etc.: see these words.

There is no similarity of aspect or nature between the plane-tree and the plantain: in fact named already by D'Acosta in 1590, so that no reason appears for a transfer of the name from the former to the latter. It has therefore been suggested that in this sense *plantane* was a corruption of some native name. And, in fact, the plantain or banana appears in Ant. Dies's Galibi Dictionary of 1684, and again in that of 1763, as *patatave*, in Raymond Breton's Carib Dict., of 1665 as '*Balatawa*, grosses bananes'; and in the Arawak being as *peritawa*. But there appears to be no material for determining whether these are native words, or merely corruption of the Spanish. The Tupi name of the fruit is *pacova*.]

1. A tree-like tropical herbaceous plant (*Musa paradisiaca*) closely allied to the Banana (*M. sapientum*), having immense undivided oblong leaves, and bearing its fruit, for which it is extensively cultivated, in long densely-clustered spikes.

Musa paradisiaca and *M. sapientum* (the Banana), if really distinct species, are very closely allied, and some of their numerous varieties are scarcely distinguishable. The names *plantain* and *banana* are also hopelessly confounded. In the West Indies, Western Africa, etc., *banana* is applied to the forms with a purple-spotted stem, and a smaller and more delicate fruit, which in eaten raw; while the name *plantain* is given to those with larger and coarser fruit, which is cooked as a vegetable: but in India the usage is reversed, *plantain* being the general name: see Yule *Hobson-Jobson*. In French, *banane* is the general name for both; as *bananier* a banana- or plantain-tree.

1. A mass or sheet of naked protoplasm, formed by the fusion, or by the aggregation, of a number of amœboid bodies (*true* or *fusion-plasmodium*, *pseudo-* or *aggregation-plasmodium*), and having an amœboid creeping movement.

First observed as one stage in the life-history of the *Myxomycetes* or *Mycetozoa*, the position of which as vegetable or animal organisms is disputed; also in certain groups of *Protozoa*, and other simple animal forms.

2. Name given to certain parasitic organisms found in the blood of patients with recent malaria, and quartan and tertian ague.

Discovered by Laveran (1880), and named by him, as a vegetable organism, *Oscillaria malariæ*; referred by Marchiafava and Celli to the animal kingdom, and called by them (1885) *Plasmodium malariæ*; more recently distinguished as belonging to two genera of Protozoa, *Laverania* and *Plasmodium*. (Minchin in Ray Lankester *Treatise on Zoology* I. ii. 243 (1903).)

1893 in *Syd. Soc. Lex.* 1897 *Allbutt's Syst. Med.* II. 324 Marchiafava and Celli described with great accuracy the intra-corpuscular amœboid form, to which they gave the name plasmodium. 1898 P. Plasmogen (plæ·zmŏjĕn). *Biol.* [f. PLASMO- + -GEN.] The chemically highest or most elaborate form, stage, or part of protoplasm, which by its vital activity forms the tissues or other organic products: true or formative protoplasm: bioplasm.

1888 E. B. LANKESTER in *Encycl. Brit.* XXIV. 805/1 *Physiologists* have come to use the word "protoplasm" for one of the chemical substances of which Schultze's protoplasm is a structural mixture—namely, that highest point in the chemical elaboration of the molecule which is attained within the protoplasm, and up to which some of the chemical bodies present are tending. ...This "critical" substance, sometimes called "true protoplasm", should assuredly be recognized by a distinct name 'plasmogen'.

1876 E. R. LANKESTER in *Quart. Micr. † **Plasmolysis** (plæzmǫ·lisis). *Biol.* [mod. (De Vries, 1877) f. PLASMO- + Gr. *λύσις* loosing, setting free.] Contraction of the protoplasm of a vegetable cell with separation or freeing of the living layer from the cell-wall, due to the withdrawal of liquid by exosmosis when the cell is placed in a liquid of greater density than the cell-sap. Hence **Plasmolyze** (-laiz) *v.* [cf. *ANALYZE*], to subject to plasmolysis, cause plasmolysis in; **Plasmolytic** (-lĭ·tik) *a.*, pertaining to, showing, or causing plasmolysis.

Plasson (plæ·sŏn). *Biol.* [a. Ger. *plasson* (Haeckel), n. Gr. *πλάσσων*, *-ον*, pres. pple. of *πλάσσειν* to mould, form.] Name for the homogeneous protoplasm of hypothetical primitive organisms, not yet differentiated into nucleus and general cell-substance, or for that of non-nucleated cells or cytodes.

1879-80 *Haeckel's Evol. Man* I. vii. 182 The vital activities of each cell form a sum of mechanical processes, which depend ordinally on movements of the smallest 'life-particles', the molecules of the living substance. If we call this molecular substance the Plasson, and the molecules the Plastidules, we may say that the individual physiological character of each cell depends on the molecular movements of its plastidules. 1904 MCCABE tr. *Haeckel's Wand.* 138 vi. 183 On the first view, which I hold, the plasm, or living matter, of the earliest organisms on the earth ...was a homogeneous plasson or archiplasm—that is to say, a plasm composed that was not yet differentiated into outer cytoplasm and inner cytoplasm.

Hence **Plasso·nity** (*homosonity*, *after passivity*, etc.), the quality of being 'plasson'.

Plaster, † **plaister** (plā·stəɹ), *sb.* Forms: **a.** 1, 4- **plaster**, 3-5 **plastre**, 4 -tir, 5 -tare, -tyr, **plaastre**, **plaister**. *β.* 4 **plaistre**, 5 **playstir**, -tyr, -tre, 5-7 **playster**, 5-9 **plaister**. [The form *plaster* occurs in sense 1 in OE., ad. pop. L. *plastrum* (mod.L. in Du Cange), shortened from *emplastrum* a plaster (medical and in grafting), a Gr. *ἔμπλαστρον* (Galen), var. of *ἔμπλαστον* plaster, salve, f. *ἐμπλάσσειν* vbl. adj. 'daubed on or over'. Cf. OHG. *pflastar*, Ger. *pflaster*, also from pop. L. In ME. reinforced by OF. *plastre* (13th c. in Littré, but the deriv. vb. *plastrier* in 12th c.), mod.F. *plâtre*, only in branch II below (for which also mod.L. *plastrum* (1233) is cited by Du Cange). Thus the medical sense was from med.L., the builder's sense through French. The collateral form *plaister*, which has been current since 14th c., and has sometimes been more common (as a written form) than *plaster*, occurs also in 14th c. in OF. (*plaistre*), but it was not the normal OF. form even in Norman or Picard, and its history is obscure. Although still frequent in the 18th c., and found in Dr. Johnson's writings, it was not recognized by him in his Dictionary. In mod. dial. *plaister* (*plē·stəɹ*) is the form in Sc. and north. Eng.]

Plat (plæt), *sb.*2 Also (6 plate), 6–7 **platt**(e. [*A collateral form of* Plot *sb.*, which arose early in the 16th c., app. under the influence of Plat *sb.*3

The chronology appears to show that *plat* in sense 1 originated as a variant of Plot *sb.* sense 2, assimilated to Plat *a.* and *sb.*3 through association of sense, a *plot of ground* being usually a *plat or flat* area. Hence also, through the notion in sense 2 of 'a piece cut flat', arose senses 3–5. But sense 1 being indifferently *plot* or *plat*, the quite vacillation of form asserted to these senses, so that they also vacied with *plot*, giving rise to senses 3–6 of Plot *sb.* Thus, in sense 1, *plat* is a variant of *plot*, but, in senses 2–5, *plot* appears to be a variant of *plat*. Both Evans and I survive in senses 1 and 2; in senses 3–5 *plat* has yielded to *plot*.]

Platitudinal, *a. rare.* [As if L. **platitūdin-*, *-ūdo*: + -AL.] cf. LATITUDINAL.] = PLATITUDINOUS.

1883 J. Coleman in *Longm. Mag.* VII. 96 'Junius' failed . . because it was a platitudinal play upon an unnecessary subject. 1900 *Daily News* 17 Oct. 4/6 His remarks do not seem to us wholly free from a modern kind of platitudinal dodge, as he calls it, and we fear that 'platitudinous' would, of the two, be more correct.

Platitudinarian (platitiūdinē·rĭăn), *sb.* and *a.* [L. as prec., after LATITUDINARIAN.]

A. *sb.* One who utters or deals in platitudes.

Times* 17 June 747/2 The Archbishop of Canterbury deprecated a little from the pens of platitudinizers, when he alluded to the 'passive resistance' movement.

As to its relation to OE. *plegan*, Du. *plegen*, Ger. *pflegen* 'to have the care of, take charge of, attend to, cultivate', 'to be in the habit of, to be wont or accustomed to', see below. The OE. verb is recorded in several diverging forms, so that it is difficult to determine its original type and the conjugation to which it belonged. The usual WSax. form *plegian* gave ME. *plein(e*, later *plein(e*, *play*; the OE. *plegian* in Anglian texts gave the northern *pleine*, *plein*. The γ forms in 2–3 *pleyen*, *pleyn*, *pleuwe*, *pleowen* appear to mix the two.

The primary senses under each of the following branches were already in OE., and the order of their development is more or less inferential; but all the uses of 'play' are said

to arise naturally from a primary notion 'to exercise, busy, or busily occupy oneself', the loss of development having been determined by the recessive or directive purport of the exercise. In the senses 'play', the sense of exercise or busy occupation disappears, and the word seems rel. cf. *Play sb.* 23 comes to mean 'to cause work, to be idle'. The same primary notion, developed in quite a different line, accounts for the continental senses of *plaga, plagan*, 'to have care of, take kindly charge of, cultivate', and 'to be in the position or habit of', sudden which suddenly imply occupying oneself busily about a thing or person, and habitually exercising oneself to an action.]
